

## Year 2 Science

Weeks commencing Monday 22<sup>nd</sup> June 2020.

We have looked at lots of materials now and I think you will be good at working out which material is good for different objects.

This week we are looking at magnets and their properties. Watch this video about magnets and which types of materials they can connect to.

<https://www.youtube.com/watch?v=s236Q1nuWXg>

If you have a magnet at home you could try to see what it sticks to around the house, but don't put magnets near mobile phones or computers as they can damage them.

Does your magnet stick to these things?

sofa	towel	fork	hinge on a door
table	fridge/freezer	washing machine	book
key	letter box	t-shirt	paperclip
