

Hello Year 2,

Some of you have been talking about thunder and lightning when I have called. I know it can sound quite loud but it is really interesting. Thunder is created by lightning. When a lightning bolt travel from the cloud to the ground, it creates a little hole in the air called a channel. Once the light has gone through the air collapses back in and creates a sound wave that we hear, that is thunder. If you are interested in finding out more about this and how lightning is made then this is a good website to look at.

Maths

Today we are now going to look at measure mass in kilograms. Remember that a kilogram is heavier than a gram. There are 1000 grams in a kilogram. Here is the link for the video today. <https://vimeo.com/432483645>

English

For the rest of the week I would like you to write your own creative short story.

Today I would like you to start by creating a plan by answering the following questions.

- What will the title be?
- Who are the main characters?
- Where in the world is the story set?
- What will happen in your story?
- How will the story end?

If you are struggling for inspiration, here is a link to the class clips, there are a few different stories you could watch to help you get some ideas.
